### Instructor's Materials

*FREE with adoption of the text, these downloadable supplemental instructor's materials are an essential classroom tool and include:*

- PowerPoint presentations for every chapter
- Complete image bank of figures and tables, in PDF format (to be inserted into provided PowerPoints or used to enhance instructor-created PowerPoints)
- PDF downloads of additional case studies and discussion questions for every chapter
- Downloadable list of important acronyms for quick and easy reference

**Q: Is the book's presentation style consistent with how students would effectively learn?**

**A:** Each chapter begins with an outline highlighting what is included. The effective use of two colors highlights the chapter headings, case studies, and information in most figures. Each chapter ends with Discussion Questions and three or more case studies along with their accompanying discussion questions. More than 40 tables and 75 figures illustrate key concepts and information in each chapter. A list of more than 260 acronyms used in the text is included in the front of the book.

**Q: Will the problems in each chapter provide good learning experiences for the students?**

**A:** The book includes more than 70 case studies, 30 new to this edition, that cover everything from ethical and legal responsibilities, managerial decision-making, healthcare technology and more—providing a rich and engaging opportunity for students to apply the knowledge from each chapter to a real-life example.

**Q: Will the students like the presentation in the textbook (layout, figures, etc.)? Is the book engaging?**

**A:** The introduction of a two-color format highlights each chapter's main topics and organization, case studies, and discussion questions. The in-depth figures and tables provide a framework of key concepts that visually enhance learning.

**Q: Does the textbook have a strong history of being a comprehensive and trusted resource?**

**A:** Trusted for more than 35 years as the go-to reference for health administration instructors, **Managing Health Services Organizations & Systems** has proven to be a valid and reliable resource.

**Q: Is the cost reasonable?**

**A:** Priced at \$139.99, this most up-to-date resource in the field is in line with competitive titles and is available in both print and e-book format.

**Q: Do other professors like the textbook?**

**A:** Visit [www.healthpropress.com/longest](http://www.healthpropress.com/longest) to read reviews and leave your own review!

**Q: Does the publisher use a reasonable time frame between new editions?**

**A:** The previous edition published in 2008 and the life of this new edition will not be less than 5 years, affording students the best scenario for end-of-semester book buyback. Additionally, this comprehensive textbook is ideal for graduating health administration students to keep as a reference as they begin their careers.
